

President Trump:

For decades, the public has rated nurses as the most trusted profession in the nation. We are Republicans, Democrats, and Independents. We represent a variety of professional experiences, including clinical, academic, research, policy and organizational nurse leaders. We feel that it is our duty to speak out against your reckless and dangerous actions that are not only endangering your own health, but endanger those around you and potentially millions of Americans by sending the wrong message. We wish you continued recovery and write to you in the hopes that you will change your behavior.

Here are a few examples of the Trump administration's actions and policies that are antithetical to a healthy society and to nursing's values and code of ethics:

- You continue to grossly mismanage the nation's response to the SARS-CoV-2 pandemic. More than 225,000 Americans have died in just seven months, and more than 7 million have been infected, many of whom are living with serious and long term health consequences. On an average day, more than 43,000 Americans test positive for COVID and hundreds more die. Every day Among these numbers are countless colleagues who risked their life to save others.
- You recently tested positive for COVID, like more than 7.5 million Americans. Unlike them, you had access to the best health care in the world. You also had access to medications that are not available broadly to the American public. We are thankful that you appear to be recovering but are concerned that your misrepresentations about the circumstances of your recovery will endanger the lives of countless Americans.
- You've made comments that downplayed the severity of COVID and undermined the public healthy guidelines and recommendations that your own administration has previously issued. You said: "don't be afraid of [Covid]" and "don't let it take over your lives." Your words and actions will lead to decreased vigilance, greater infection rates and will directly put the safety of nurses across the country at risk.

Your statements and actions are reprehensible and put the safety and wellbeing of millions of Americans, including our colleagues, at risk. Too many nurses, as well as our colleagues across healthcare, still don't have proper PPE to protect them from this highly contagious disease. We are afraid. We are afraid for our lives and our loved ones' lives.

Sincerely,

Teresa Antonio, Nanuet, NY, Registered Nurse
